### **DETAILED ACTION**

Applicant's amendment of 4-21-03 has been fully considered. The amendment to the specification has broaden the scope of the invention as intended by the original oath/declaration of the parent case.

1. Note, the divisional application should set forth only that portion of the earlier disclosure, which is germane to the invention as claimed in the divisional application. By changing the specification, the instant application no longer has the status of a divisional application.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Specification***

3. The amendment filed 4-21-03 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: The deletion of the proviso from the specification allows for a broader scope of rings A and B, which has no support from the original disclosure.

Applicant is required to cancel the new matter in the reply to this Office Action.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. **New Matter:** Claims 1, 2, 7, 16, 18, 23, 24, 26-33, 36, 43, 44, and 50-55 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment to the specification does not remedy the lack of description and enablement for compounds having A and/or B as a phenyl ring (or benzo). There is no guidance in the instant disclosure to direct the skilled chemist to select compounds A and/or B as a phenyl ring (or benzo). All the disclosed species have A and/or B as a heterocycle (or heteroaryl). Thus, the claims lack descriptive support for the above reasons and for those stated previously.

#### ***Claim Objections***

5. Claim 34 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1624

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
